

A Basic Guide to the Meaning of the Letters on Cicada Wings

From CicadaMania.com

There is an “old wives tale” that says that if you see a “W” on a cicada’s wing that there will be war, and if you see a “P” there will be peace. What you see is in the eyes of the “bugholder”, but I’ve personally only seen a “W”, which almost seems logical, because there is always a war going on somewhere.
